## Hello & Welcome

Since The Real Olive Company's humble beginnings in Bristol's historic St Nicholas market in 1998, a lot has changed, but our values have remained the same; to source and supply the best quality olives and Mediterranean foods.

Specialising in fresh olives and antipasti we freshly prepare a unique range of Mediterranean inspired real foods at our accredited production site in the heart of Bristol.

Our commitment to quality and sustainability has led us to being certified by Organic Farmers and Growers as an organic producer and we offer a unique range of organic products in addition to our conventional range.

Have a good look through our catalogue and you will find everything we offer in our foodservice range from our to our ready to serve 1kg range to our snack pots, deli pots, unique tapenades and pestos all expertly blended by our in-house team.

Our olives, we should hasten to add, remain the same delicious fruits the ancients knew, growing in the old unhurried way in the same Mediterranean groves. We prepare them using time honoured methods, then package them with the greatest care to ensure that they reach you, our customers, in perfect condition. Live, love, eat olives!

# Why choose The Real Olive Company?

## Our products

Our olives are allowed to take their time to ripen under azure Mediterranean skies through the sun-soaked summer months. In the autumn, when the fruit is still fresh and green, our farmers collect the first harvest, and in January the dark, fully ripe olives are carefully gathered in.

In our quest to find the perfect olive we are fully certified by Organic Farmers & Growers as a UK organic producer. When food is farmed organically, it is not 'propped up' by artificial fertilisers or pesticides. This means that it must be naturally resilient, and for this it must come from strong soil teeming with nutrients and beneficial micro-organisms. This is good for the plants, good for the land, and good for us.

Our manufacturing process is accredited by 'SALSA - Safe & Local Supplier association.

## Our packaging

Sustainability is at our very core and underpins our company values. We continue to work closely with our innovative packaging suppliers with an ultimate goal of ensuring all our packaging is 100% recyclable.

Our current fully recyclable foodservice packaging is the most green and sustainable option available. We believe that our current foodservice packaging solutions offer the most minimal impact to the planet and environment when considering all of the criteria.

For more information on our research and sustainability please see our website.

## Our suppliers

Over the years we have travelled all over the Mediterranean building up a network of farmers who grow olives independently and on a small scale.

Together we understand the unhurried gentle rhythms of the olive tree and know from long experience that the best olives grow where flora and fauna flourish. The organic groves help to create a haven for wildflowers, insects and birds as they have remained for thousands of years.

With the majority of our farmers living on the land they farm, their lives and work are often entwined. Their values and passions run through their day to day lives and for them the health of the land is paramount to the well being of the groves. The result; a successful and bountiful harvest year after year.

As a part of our commitment to sustainability and protecting the planet for future generation we have recently partnered with the Sustainable Solis Alliance (SSA). We have pledged to donate 1% of our profits to invest in their work to improve soil health for future generations.

We strongly believe that a bright and positive future for us all on this beautiful planet is well within our reach. We are committed to building a business that puts the welfare of people and planet above all else for generations to come.

## Our future together & the responsibility of business

Our three core pillars of ethical business;

1. To advance our purpose; whilst offering people a sense of belonging and a feeling that their lives and their work have value beyond their physical work.
2. To protect people; by operating our company in a way that protects the people who work for us, the people who buy from us and the environments in which we live and work.
3. To generate profit & sustainability; so that we may continue to advance the first two priorities.

For our business, profit is a result and not a purpose.
